

## Fragrance Sealed In Metal

# "SALIA" TEA

"Fresh from the Gardens"

### Be Careful.

The season is close at hand when once again the roads and highways of the country will witness the passing to and fro, in numbers almost beyond counting, of automobiles, trucks, buses, vans, motor propelled vehicles of all descriptions. Farmers enroute to their marketing centres, city and town people bound for their summer cottages or other resorts, tourists from far and near, commercial travellers and others engaged on business, freight and express cars moving in all directions, will be claiming right-of-way upon rural roads, city streets and provincial highways.

Past years have recorded an ever mounting toll of accidents resulting from all this modern, high powered highway traffic. The lists of killed, maimed for life, seriously and less seriously injured, the money loss in damaged property, have been appalling.

The question is: What is to be the record for this year? Is this costly toll to go higher still, or are we as a civilized people going to come to our senses, and in this year bring about a lessening of these losses?

The following figures have been compiled across the international boundary line. They apply only to the United States, but, while conditions may be somewhat better in Canada, because our population is smaller and our traffic less congested, much the same situation prevails. There is, therefore, a lesson and a warning in these figures for the people of this Dominion. Reference has been made in this column on more than one occasion previously to this subject, but no apology is offered for again directing attention to it at this time because of its importance and in the hope that thereby at least some drivers of motor cars will exercise more caution.

Every year from 1917 through 1931 deaths from automobile accidents have steadily increased. Last year 34,400 people were killed in automotive accidents. Nearly a million others, 997,600 were injured. Losses for a period of eighteen months ending December 31, 1931, exceeded even the United States sacrifices of the World War.

The money cost, also, is prodigious. The Travelers Insurance Company reckons the annual loss at \$2,500,000,000.

This is a staggering sum. It is larger than the entire cost of public education in the United States. It is far greater than the entire cost, exclusive of war debts, of the Federal Government. Examination of the circumstances surrounding these accidents shows clearly that they were avoidable. Here are some of the salient facts:

More than 90 per cent. of the motor vehicles involved in personal injury accidents in 1931 were in good condition. More than 80 per cent. of the accidents occurred in clear weather with dry roads. More than 90 per cent. of the accidents involved drivers of more than one year's experience.

The most hazardous age for driving is under twenty. One male driver out of every twenty-two licensed was involved in a personal injury accident. Only one woman out of every eighty-eight licensed was involved in an accident.

The outstanding fact is that automobiles are improperly operated. Exceeding the speed limit was the explanation of 67,080 accidents. Drivers on the wrong side of the road accounted for 62,560. Those who did not have the right-of-way accounted for the largest number, 119,330. Cutting in caused 33,540. Failing to signal accounted for 27,740. Driving off the road-way explained 66,550. Plain reckless driving added another 34,830.

Just one conclusion is possible. Heedless, reckless, inconsiderate driving is taking this tragic toll of life and treasure.

The remedy is not, however, to be found in drastic statutes and regulations limiting speed. That experiment has been tried and it proved an utter failure.

What is practicable is the insistence by law and public opinion upon safe driving at all times and at all places. The man or woman who tends to drive in a way dangerous to pedestrians or other motorists should be denied a license, and if they have already received one, it should be withdrawn. Licenses must be taken from drunken drivers, incompetent drivers and reckless drivers.

Respect for the law and voluntary observation of the rules of safe driving are required. Motorists as a class may well organize for safety, and pedestrians should recognize the fact that, on our motor driven streets and highways, they take their lives in their hands when they disregard the regulations and bylaws enacted for their own safety.

The vast majority of cars are dependable today, but, like any piece of machinery, some part may weaken or get out of order. It is, therefore, the duty of the driver to have it checked over thoroughly and frequently. His own life, as well as the lives of others, may depend upon the precaution.

But, in the final analysis, and in an overwhelming majority of cases, it is the driver, not the condition of the car, who is responsible for accidents. It is the human element that counts; that is the vital factor in nearly all these tragedies. Law alone cannot control him, although it may punish him afterwards, providing he is alive to receive punishment. He must control himself.

## Russia Threatened With Seed Shortage

Country Evidently Exported More Wheat Than Harvest Justified

During the past month interesting news has been forthcoming from Russia in connection with the difficulties that the Soviet authorities are experiencing as a result of poor harvests in some areas last year, suggesting that Russia has exported more wheat than was justified by the crop harvested in 1931. This information was contained in a statement issued by H. H. Stevens, Minister of Trade and Commerce.

In a cable received by the bureau early in March it was stated that at the end of 1931 there were 150,000 tractors in Russia, of which number 70 per cent. required repairs. Up to February 20, only 44.3 per cent. damaged tractors had been reconditioned.

A further cable received on March 15, stated that up to March 1, 50 per cent. of the tractors needing repairs had been placed in operating condition.

## MOURNING WARDROBE

"A death occurred in our family and I had to go in mourning. I could hardly afford to buy all black clothes, so decided to dye what I had. I consulted our druggist and he advised using Diamond Dyes. Everything came out beautifully; coats, wool dresses, stockings and I have since learned to appreciate the excellence of the black Diamond Dyes. I tried another black dye and the results were impossible. I had to dye a rug a lovely garnet with Diamond Dyes. They are real money savers—the finest dyes money can buy—I truly believe."

Mrs. G.K.L., Montreal.

## France Hoarding Gold

Has Now Passed United States In Volume Of Holdings In Bank

The Bank of France has now passed the Federal Reserve Bank of the United States in volume of gold holdings. The figures as at March 1 are as follows:

Bank of France	\$2,942,312,800
Federal Reserve (U.S.)	2,938,974,000
Bank of England	590,259,000

The French holdings are the highest in history. It is noteworthy, however, that the United States Treasury also holds large stores of gold. In total figures of monetary gold holdings, the United States leads France by \$1,408,000,000. England also possesses large supplies of private gold reserves not shown in the figures.

## Future Of New York

Wonderful Development Is Predicted Within Next Thirty Years

Twenty million inhabitants. A series of industrial and business centers connected by electric rapid transit so that workers can ride to any one without changing cars. Belt-line railways for passengers and freight; airports by the dozen; a vast system of motor highways, boulevards and parkways; more than 5,000 square miles in one gigantic city. That is the New York of 1965, envisioned by "The Regional Plan of New York and Environs."

**Powerful Medicine.**—The healing properties in six essential oils are concentrated in every bottle of Dr. Thomas' Eclectic Oil, forming one of the most beneficial liniments ever offered to the use of man. Many can testify as to its power in allaying pain, and many more can certify that they owe their health to it. Its wonderful power is not expressed by the small price at which it sells.

## Travellers Entertained

Passengers who miss their trains or have long waits at the St. Lazare Station, Paris, will shortly be able to enjoy a thirty-minute film show while waiting. The cinema, which will hold 250 people, will give a continuous performance from 9 a.m. till midnight.

Ancient cloisters, or parts of them, are still to be found in many parts of London; they are reminders of the days when the city boasted spacious monastic establishments.

**PURELY VEGETABLE**  
Act gently but surely on both liver and bowels  
**Safe for CHILDREN**  
Sold everywhere in 25c and 75c red tins.  
**CARTER'S LITTLE PILLS**

W. N. U. 1938

## Rheumatism So Bad He Had to Quit Work

Albert Berger Not Bothered Since Relieved by Dr. Williams' Pink Pills.

Working Every Day Now.

"I was terribly bothered with a weak back and rheumatism in my shoulders," writes Albert Berger, Wingle, Ont. "It got so bad I had to stop working and stay in the house. I was two weeks in bed, when a friend advised me to try Dr. Williams' Pink Pills. I gave the Pills a fair trial, and they relieved me right away. My back is good and strong now, and I am working every day. I have never been bothered with rheumatism since. I recommend them for anyone suffering from Rheumatism, Lame Back, Sciatica, Rheumatism and kindred ailments thin the blood very rapidly. Dr. Williams' Pink Pills enrich the blood stream and create new red blood cells, which is the reason they are so successful in combating such ailments. Equally good for all rundown or nervously exhausted people. Try them. At your druggist's, 50c, 27c."

## Ask Rate Adjustment

Want Fair Rate Basis On Shipments Going To Churchill

Adoption of the distribution or town tariff freight rate basis for Churchill cargoes is sought by the Saskatoon Board of Trade.

Opposition to the Fort William terminal basis for incoming and outgoing shipments by the Hudson Bay route was voiced at the quarterly meeting of the board.

The Fort William rate would enforce a rate for distributing centres based on 85 per cent. of the standard mileage in place of a rate fixed on the mileage less an arbitrary deduction of 130 miles no matter the distance from the terminal. The Board of Trade claims that this latter basis is unfair in that it gives a decided advantage to points near the terminus.

## Time For Private Members Is Limited

Allowed One Hour In Evening Twice A Week

Time allotted for private members in the House of Commons will be still further restricted. The government gave notice that after March 21, government business will take precedence on that day until the end of the session. A resolution taking Wednesday for government business has been approved by the House. When Monday was also taken over for government business, the only time remaining for private members will be one hour in the evenings on two nights a week.

**Persian Balm**—alluring, provocative and charming. Fragrant and refreshing as a cool breeze in summer. Delightful to use. Creates delicious sensations of surpassing loveliness. Makes the skin velvety soft in texture. Soothes and dispels all irritations caused by weather conditions. Softens and whitens the hands. Persian Balm is a peerless toilet requisite for women who desire to keep their complexion. Use it for hands and face.

## Significance Of Trifles

Genius In Business Watches The Little Things

The post office spends hundreds of pounds every year because most people point two or three fingers in sending one telegram. The color of the eggshell may make the difference between profit and loss on a poultry farm, so poultry farmers are now coloring the shells.

An English firm for a century sold squares of colored cotton which were used as a head-dress by women in Eastern Europe until a German discovered that the woman preferred oblong pieces to squares. The German made oblongs and England lost the market.

The man of genius in business is the man with an eye for the little things.—London Sunday Express.

## Something Wrong Somewhere

Should Be Plenty Of Work For Everybody Unemployed

As long as men and women and children are starving for hunger, over-production of food is a myth. As long as millions are going landless, clad, over-production of clothing is a myth. As long as everybody is wanting something not to be had, there is plenty of work for everybody unemployed, if we direct activity into the proper channels. We are not as clever as we thought we were, but just as dumb and conceited about it. We must learn to drop our fallacies. That is the business of the rising generation.—Hamilton Herald.

A transparent adhesive tape that requires no moistening has been produced from cellophane.

Truth may be embarrassing at the time it is uttered. It is the lie that rises up to give trouble later.

## Tinting the Highways

California Would Like Tan Cement For Roads and Pavements

Sun-kist California wants her sun tan recognized as a sort of trade mark. Down there they want all roads and pavements colored in modernistic tones but rather lean to sun tans. They have discovered an apt process which will make the tinting of sidewalks and highways that color without the least additional cost. The city reports that a far western cement manufacturing concern has found a way to produce a tan-toned cement, without the addition of any coloring material, merely by a special burning process. San Francisco also finds the public awake to the desirability of having other colors than the familiar whitish gray of the ordinary cement mixtures in the construction of pavements. So if they can burn a tan cement maybe the chemists will find a means also of turning out a self-coloring blue, green or even pink. The far western concern's officers have declared their new tan cement to be the finest real improvement in the basic color of Portland cement introduced in 108 years.—Brandon Sun.

## Seeks Damages

Action Commenced On Account Of Death Of Seaman On Submarine

"Nautilus"

Suit for \$100,000 damages was begun recently against the Trans-Arctic Submarine Expedition Company of Delaware, which financed the expedition toward the North Pole led by Sir Hubert Wilkins.

The action is brought by the administrator of the estate of William I. Grimmer, seaman, who was swept from the submarine "Nautilus" by high seas and drowned last March 21. The complaint alleges the life-line was not equipped with secure fasteners and negligence of those in charge of operations led to Grimmer's death.

Douglas' Egyptian Liniment makes the finest blister known. Is valuable for stock. Leaves the hair roots in natural and healthy condition. Hair comes back no scar remains.

## New Zealand Leads

The tendency to live in over-heated rooms is cited as one reason for Canada's high infant mortality rate, in a statement issued by the Canadian Council for Child and Family Welfare. New Zealand's low mortality rate—lowest in the world—is attributable to lack of crowding, equable climate and "the lesser diseases." "There is little or no real poverty there," the report adds.

To admit as much light as possible a steel-frame house recently built in Paris is composed entirely of glass, transparent everywhere save in the bathroom.

Oke.—Would you be happy if you had all the money you wanted? Owens.—I'd be happy if I had all the money my creditors wanted.

Gold produced in Alaska during 1931 was valued at \$9,342,000, an increase of about a million dollars over the previous year's production.

## Resents Importation Of Soviet Timber

May Bar B.C. Lumber From British Market Says London Times

The approximate cost of the huge timber contract completed between British importers and Soviet Russia exporters is placed at £4,500,000 by the Times.

The schedule of prices for the timber, amounting to 450,000 standards and to be delivered this year, provides that if market prices of similar grades of wood from Sweden or Finland falls, appropriate adjustments up to a limit of £2 per standard may be made in the schedule of Russian prices.

The contract is said to provide for the purchase of one-quarter of the entire supply of softwoods needed by Great Britain from Russia, the normal annual import being 1,600,000 standards. The timber trade declares this bulk buying is beneficial in preventing fluctuations in price and "dumping."

In a leading editorial the Times said a disagreeable impression would be produced by the announcement of the contract. "Conditions under which much Russian timber is cut and transported are such that its importation should be prohibited altogether, and there will be natural resentment that a contract on this huge scale has been concluded," the Times said.

"Among other effects it will help to shut British Columbia timber out of the British market."

During the last five years, the Times pointed out, Britain imported £135,000,000 worth of goods from Russia and exported only £25,000,000 worth of goods to that country. Moreover while cash was paid for the British purchases, almost all the goods sold to Russia were on a credit basis, the sum of money being accumulated in Russia being used by the Soviet to buy equipment for its five-year-plan from Germany and the United States, and to finance subversive agitation in Great Britain, India, China and elsewhere."

Cora: Would you marry a man for his money?

Dora: Not exactly. But I'd want my husband to have a lovely disposition, and if he didn't have money he'd very likely be worried and ill-natured.

For hunters and campers a collapsible drinking cup weighing less than two ounces has been designed carrying a compass and mirror on its bottom and a magnifying glass in its cover.

France has 10,000 more railway employees than in 1913.

# "SICK HEADACHE?"

It is not necessary to give-in to headaches. It is just a bit old-fashioned! The modern woman who feels a headache coming on at any time, takes some tablets of Aspirin and heads it off.

Keep Aspirin handy, and keep your engagements. Headaches, systemic pains, come at inconvenient times. So do colds. You can end them before they're fairly started if you'll only remember this handy, harmless form of relief. Carry it in your purse and insure your comfort while shopping; your evening's pleasure at the theatre. Those little nagging aches that bring a case of "nerves" by day are ended in a jiffy. Pains that once kept people home are forgotten half an hour after taking Aspirin! You'll find these tablets always help. In every

package of Aspirin tablets are proven directions which cover colds, headaches, sore throat, toothache, neuralgia, neuritis, sciatica, and even rheumatism.

The tablets stamped Bayer won't hurt you, and they don't harm you. They don't depress the heart. They don't upset the stomach. So take them whenever you need them, and take enough to end the pain. Aspirin is made in Canada.

## Level Crossing Accidents

Quebec Man Demonstrates Devise To Overcome Danger

An automatic gate, the inventor of which claims it will prevent accidents at level crossings, was demonstrated to provincial road department officials at Quebec. The inventor is Maurice Hebert of Sherbrooke.

The gate is worked by electric contact, located several hundred feet from the crossing. The moment the forward wheels of the locomotive touch the point of contact, the gates begin to lower slowly, at the same time starting the ring of a bell. The bell continues to ring and the gate remains closed until the last wheel of the rear coach has passed the point of contact.

Cadmium and gold are combined to make certain green alloys for jewelry.

## Live Poultry Shipments

Policy Of Saskatchewan Department Of Agriculture Proves successful

According to Howard Cross, secretary and field service representative of the poultry division, Saskatchewan Department of Agriculture, the new policy introduced into Saskatchewan last year of loading live hens — in July and August—proved quite successful and satisfactory to the farmers. "We loaded at 47 points in the province," he said, "and 15 cars were shipped out containing 55,000 birds. This year we expect to load 20 cars."

To have the children sound and healthy is the first care of a mother. They cannot be healthy if troubled with worms. Use Mother Graves Worm Exterminator.

## Apart From That

A dealer in South Germany has been arrested for selling cheese which was considered not fit for human consumption because—

- (a) Rats had gnawed holes in it.
- (b) Some of the holes had been filled with cement.
- (c) It was rotten.

"Otherwise," says Reuter's Munich correspondent, "the cheese was all right."

Men have been making glass for about 5,000 years, but it is only in the past 25 years that machinery has been adapted to this ancient craft.

Try Lydia E. Pinkham's Vegetable Compound

**Too "Worn-Out" to go**  
Another date broken . . . Couldn't stay on her feet a minute longer! Lydia E. Pinkham's Vegetable Compound always relieves cramps. Try it next month.

## Increased Population For Canada Will Be Necessary Soon To Help Liquidate National Obligations

To those who think superficially, it may seem out of place, in the presence of considerable unemployment throughout the Dominion, to talk of plans for increasing the population of the country by means of selected immigration. Nothing is clearer, however, than the fact that Canada, with its immense area and vast vacant spaces, cannot hope to pay its way or to carry its immense established overhead without more shoulders upon which to place the burden. The Dominion has a financial, industrial and railway plant which equips it to care for twenty or twenty-five million people, instead of only ten million as at present.

If we could secure additional population by gradual means and establish it on a sound economic basis, our national troubles would disappear. A public debt of \$2,300,000,000, a huge railway debt and the existing load of provincial and municipal debts would no longer be beyond our capacity. With several million people we could pay the interest easily and gradually liquidate the principal. The railways would have more people and goods to carry, their deficits would be turned into surpluses, and our industries would have larger domestic markets for their products. Our paper and pulp mill establishments would no longer be too large for the country. It is quite clear that Canada's greatest need is more people for its vacant spaces, more farmers to till its unoccupied lands, more producers and more consumers of all kinds.

The inauguration of an adequate immigration policy must, of course, await the return of normal world conditions, so that there will be adequate markets abroad for our products, and particularly for the primary products of farm, land, forest and fishery. If the Imperial Conference, to be held at Ottawa next July, proves the success that is anticipated its decisions will in time go far to supply such markets. In any event we are glad to note that, in the words of Rt. Hon. J. H. Thomas, Secretary of State for the Dominions in the British Parliament, the question of intra-Empire migration is to form one of the important subjects of discussion at the conference. There is reason for satisfaction that the Canadian Government takes the same view, for, as Hon. W. A. Gordon, Acting Minister of Immigration, said at Ottawa recently, "Whether we like it or not, we must get over to the positive side of immigration because we must have more people if we hope to pay off a debt with which ten million people are loaded at present by reason of the railway problem on our hands." Another important consideration is the need of bringing in more British people of the right kind to strengthen and stabilize the Anglo-Saxon elements in our population and to buttress the British sentiments of the country.—Toronto Mail and Empire.

### The Whole Truth

A cinema actor suing for a breach of contract described himself as the greatest actor in the world. One of his friends took him to task for so loudly singing his own praises. "I know," replied the actor, "it must have sounded somewhat conceited, but remember I was on 'cath.'"

### Right Up-To-Date

Bobby (short of money).—"I say, dad, have you any work you'd like me to do?"  
Father (taken by surprise).—"Why no—but—"  
Bobby.—"Then would you like to put me on the dole?"

Business is like a wheel barrow. It stands still unless somebody pushes it.

Life is worth living better than most men live it.

"What has he done?"  
"He attempted to strike me."  
"Then what is he charged with?"  
"Attempted suicide?" — *Gemutliche Sachse, Leipzig.*

W. N. U. 1935

### Not As Pictured

Members Of British House Of Lords Are Sturdy Patriots

The Prince of Wales has unveiled a Memorial in the Royal Gallery of the House of Lords to 245 peers who lost their lives in the World War. These figures are startling. They represent fully one-third of the total membership. Just think what one community would have sacrificed were the 245 out of 740 male members of the population to be killed or die of wounds.

Prior to the war the Lords were in disfavor with a large section of the British people. Mr. Lloyd George had worked up a terrific agitation against them. He virtually pictured them as a lot of blood-suckers living on the people and grinding the masses down in poverty.

But in fact the peers were, and are, about the sturdiest patriots in the British constitution. By their hereditary rights of rulership, public service is one of the first things they think of. Their sons officer the army and the navy. There is scarcely any other occupation for a peer's son. They enter the services as a matter of course. And when the time comes the officers are right in the thick of things.

Much of Britain's finest blood, peers and the sons of peers, the latter running into thousands, is spilled in defense of Britain whenever and wherever the army or navy are engaged.—St. Thomas Times-Journal.

BY Annette

MANY A LITTLE GIRL SIGHS FOR A BOLEERO DRESS SUCH AS DEBUTANTE SISTER WEARS

Today's model is quite the easiest thing in the world to fashion. The caped collar gives it a smart difference, and is so girlish and pretty. You'll like the rather straight tailored appearance of the skirt. Inverted plaits at the front, provide ample flare.

Deep blue sheer checked woolen made the skirt and bolero jacket. Then there's the delicious blouse of fresh linen in orange-red shade. The tie of crepe de chine tones with the blue.

Or perhaps you don't care about woolen? You prefer daughter in wash frocks. Why then the entire dress may be made of linen in lovely new pink shade with white or in French blue with white.

Style No. 857 is designed for sizes 6, 8, 10 and 12 years. Size 8 requires 1 1/2 yards of 39-inch material for bolero and skirt with 3/4 yard of 39-inch material for waist.

Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

### Place Families On Farms

Plan To Move Destitute Residents From Cities To Farms In Saskatchewan

Depending on agreement with the Federal Government, the provincial government, in conjunction with the three larger cities, in Saskatchewan, will place 1,200 families on farms in northern Saskatchewan, and there is the possibility that this scheme will extend to take in 2,000 families throughout the province. The present plan is that the provincial government find the land under its land settlement scheme and the provincial federal and municipal governments each bear a third of the cost of equipping the families to take up their farm duties.

It is understood that each family will be given stock and equipment up to a value of \$300, that suitable land will be found for them, buildings erected from timber drawn from land or adjacent territory and that the farms will be under the supervision of an inspector of the natural resources department. The scheme is understood to have been advanced by deputations from Moose Jaw, Saskatoon and Regina, and to have been favorably received by the cabinet.

It is understood there are 500 destitute families in Regina, 400 in Saskatoon and 300 in Moose Jaw, all reported to be ready to take up farming under this scheme.

### The Field Force Counts

Attention Is Called To An Important Phase Of Honey Production

C. B. Gooderham, Dominion Apiarist at Ottawa, calls attention to an important phase of honey production in the following statement: "The amount of honey which a colony can gather is largely dependent upon the number of bees that colony can release for field work during the period of honey flow and upon the ability of the beekeeper to keep this force constantly working. The total number of bees within the colony is not a reliable index as to its ability to gather honey, because it is only those bees that are above a definite age that are effective as nectar gatherers and it is the number of bees in this force that counts in the production of surplus honey and furthermore, the strength of this force is dependent upon the care given the colony during the previous eleven months and not upon spring management alone as so many beekeepers fondly hope."

### Color Attracts Butterflies

Tests Show Green Was Not At All Popular

It is the color, and not the odor, of flowers that attracts butterflies, says Popular Mechanics Magazine. This was proved in tests in Germany where paper flowers were scattered in a garden with blooming ones. It was found that the insects settled indiscriminately on both kinds to seek food. The experiment further revealed that different species displayed preferences for special colors, some yellow and blue, others blue and purple, but none of them was attracted by green.

By projecting a stream of hot air several feet in front of his car by means of a unique blower, an Englishman hopes to banish the danger of driving an automobile in foggy weather.

So sensitive is nitrogen iodine, one of the world's most "touchy" explosives, that it will "go off" when touched by a feather.

### THE OLDEST MAN

Claiming to be 158 and therefore the oldest man in the world, Zoro Agre (above), is near death in London. The aged Turk toured this continent last year when this picture was made.

### The Cutworm Threat

Warning Issued To Avoid Potential Losses From Pest This Year

With a view to enabling farmers in Saskatchewan and Alberta to avoid or reduce potential losses from cutworm damage this year, Arthur Gibson, Dominion entomologist, has issued a special notice in which particular attention is called to the fact that in those areas in which severe losses on account of damage by the pale western cutworm were caused in 1931 even greater losses may be expected in 1932, providing weather conditions are average, and that even a very wet spring will only partially check the immediate ravages.

Any fields which were undisturbed so that the soil surface was caked or crusted from August 1 to September 15 in 1931, should be reasonably free of cutworms this year, and resurfaced fields which were cut after September 15 in 1931, should be considered as safe if undisturbed during August.

In any case where there is doubt as to a field being free of cutworms a test should be made seeding an indicator strip of wheat. This indicator strip should be seeded as early as it is possible to get a drill on the land and long before regular seedling starts. One strip wide is sufficient, and such a diagonal strip will give a fair example of the condition of the field, as weather conditions which will bring this grain to a height of about five inches will also hatch many of the eggs.

If on examination from 10 to 15 plants per square yard show injury the field should not be seeded. Under normal conditions this strip will show whether or not cutworms are present by the end of the first week of May, or earlier, and seeding operations should be governed accordingly. No field should be seeded to any crop, especially flax, where cutworm damage is evident so long as there are cutworms present and active.

Detailed information as to the cutworm situation and its control can be secured by writing to the Dominion entomological laboratories at Trebank, Manitoba, Indian Head and Assiniboia in Saskatchewan; Lethbridge or Morris in Alberta, or to the provincial departments of Agriculture at Regina or Edmonton.

One way to keep a body from becoming a busbody is to keep a body busy.

## Radial Rings On Tree Trunks Reveal Age And History Of Dry Seasons Of The Past

### Wheat Not Included

In Germany's Super Tariff Against Goods From Canada

The Reichsanzeiger, official gazette of the German Government, publishes a decree authorizing the finance minister to impose the so-called super-tariff against goods from Canada, increasing existing duties 100 per cent as from April 1.

Goods specifically mentioned in the decree were: Fresh, dried and tinned fruits, fish, lobsters, oysters, turtles, flour, butter, paper, cardboard, aluminum, shoes, certain kinds of machinery. Canadian wheat was not included in the list.

The decree provided that the duties can be suspended for six months, providing Canada at once enters into negotiations with Germany for the conclusion of a commercial treaty.

Germany is one of the few countries in central Europe with which Canada has never concluded a commercial treaty. Canada has had commercial treaties with France, Belgium, Holland, Spain, Czechoslovakia, Finland, Hungary, Estonia, the Serb, Croat and Slovene Kingdom, Roumania and Lithuania.

### Canadian Humor

Type By Itself and Is Essentially Good-Natured

Canadian humor as a type differs from American and English alike, writes Lionel Stevenson in "Appraisals of Canadian Literature." There is not the characteristic exaggeration of the one, nor the characteristic restraint of the other. There is a closest affinity, perhaps, with the Scottish type, exemplified by Barrie, with his whimsicality and sympathetic indulgence, but the Canadian style is more downright, and deals more with action, less with character. It is a hearty sense of fun, arising from genuine joy of life, including an eye for the absurd which is latent in the commonplace. It is essentially good-natured. Steering a perilous course between crudity and sentimentality, it usually contrives to avoid both, by sheer force of simple, sunny cheerfulness.

### Beans Make Good Crop

Interest In Growing Beans In Western Canada Is Increasing

The Dominion Experimental Station at Lethbridge, Alberta, reports a decided increase in interest in the growing of field beans in western Canada, particularly in irrigated areas. Heretofore practically all the beans used in cities and towns of western Canada have been imported from Japan, the United States and Eastern Canada. A point like Lethbridge, for example, uses about six carloads of 30,000 pounds each annually. Beans require a long season to mature and should be planted sufficiently early to ensure against loss from fall frosts. The small white varieties are best suited to market demand, and it is also pointed out that too rich land, too heavy irrigation, too thin seeding, and too wide spacing of rows all tend to prolong the period of growth.

Montreal Boulevard, which may be constructed from one end to the other of Island of Montreal, in Quebec, may cost as high as \$12,554,000.

### New Diving Apparatus

A deep-sea diving apparatus, which will allow exploration and work at depths of 10,000 feet and more, has been invented in Germany. The contrivance is shaped like an egg and its metal shell is made to resist enormous water pressure by automatically adjusting the interior air pressure through the vaporization of liquid air.

### Cold Storage For Apples

The Vancouver Harbor Board still has under advisement plans for the construction of a cool room at one of the board's piers with a capacity of 100,000 boxes of apples, designed principally to facilitate the handling of the export apple crop from the Okanagan.

Glasgow, Scotland, police are warning on shoplifters.

"The greedy fellow. I have been here for an hour and he won't allow me to look in!" — *Buen Humor, Madrid.*

### A SOLDIER-PRESIDENT ON PARADE

Attired in the full dress uniform of his rank as Field Marshal, President von Hindenburg of Germany recalls the war days of 1914-18 when he was leading his country in the most disastrous war in history. The 84-year-old soldier-President is shown as he reviewed the Quaden Regiment of Berlin on the Mehlis Field. Next to von Hindenburg is Oberst von Tiedemann, commander of the regiment, while at the extreme left is General von Hammerstein, Commander-in-Chief of the German Army.

## U. F. A. GOVERNMENT'S RECORD

### A REPLY TO GOVERNMENT CRITICS ON THE FINANCIAL RECORD OF THE U.F.A. ADMINISTRATION.

Taken from the Budget Speech of J. R. Love, M.L.A. Member for Wainwright

(Continued from last week.)

#### PUBLIC DEBT

"Perhaps the most startling feature in connection with our public debt is the enormous increase of \$18,411,915.00 in the one year from December 31st, 1930, to December 31st, 1931. Merely to say that this is small compared to the \$37,468,000.00 added to the public debt of our sister province of Saskatchewan for the same twelve months is not an answer that will satisfy our critics. There is only one way to determine whether such an increase to our public debt in one year is justified or not, and that is to examine the various items involved. If members opposite will examine the capital appropriations passed by the Legislature last year, they will find that the Government has kept well within the estimates with respect to these items, adding less than \$5,000,000.00 to the public debt for highways, public buildings, telephones and the Lethbridge Northern. That leaves approximately \$13,500,000.00 to account for. From this amount we must deduct over \$5,500,000.00 for the Wheat Pool guarantee which was also ratified by the Legislature one year ago. So long as the Wheat Pool can meet its interest charges, this item will not, in any way, be a charge on the ordinary taxpayer. This leaves less than \$8,000,000.00 still to account for. No one can criticize the amount spent on unemployment relief which accounts for nearly \$3,500,000.00 of which three-quarters of a million dollars is recoverable to the Province from other authorities. One of our daily newspapers, that is most severe and persistent in its criticism of the Government claims that the Province should bear a greater share of the cost of unemployment relief. I have yet to hear any opponent of the Government claim that the Province is carrying its share of this cost.

"Mr. Speaker, this leaves less than \$4,500,000.00 of the \$18,500,000.00 increase in debt to be used for the purpose of capitalizing the income deficit at the end of the year. Yes, \$18,500,000.00 is a very large sum to add to our public debt in one year but I challenge any member of the Opposition to point out how it might have been avoided. It is all very well to say that a Government should follow the example of industry and reduce its overhead in keeping with economic conditions. When the heads of our great financial institutions take this stand, they are forgetting one of the basic responsibilities of any democratic government. The weakness of our capitalistic system is that the human element is the tool of industry instead of industry being the servant of humanity. Thus when industry throws millions of its employees overboard in order to reduce overhead costs, the only economic salvation for the victims of such a policy is to climb aboard the ship of state which is still established in democratic countries for the service of humanity and whose expenditures for unemployment relief are bound to increase with

"Now, Mr. Speaker, much has been said regarding the increase in debt since 1921. The confusion that exists in this connection is due to the fact that the public is often given just half the story regarding our debt. I therefore, wish to prove beyond any doubt that the public debt of Alberta, direct and indirect, has not been doubled since 1921 by any means. The total debt of the Province on December 31st, 1921, was \$87,872,000.00 and not \$57,464,000.00 which only represents the direct debt. By December 31st, 1931, the direct debt of the Province had been increased by \$67,624,000.00 and the indirect debt decreased by \$19,102,000.00, leaving a net increase for the total debt of the Province since 1921, of \$48,622,000.00 of which over \$18,000,000.00 was added during the past year.

"When our opponents criticize the Government for the increases that have been added to the public debt, they fail to point out wherein these increases have been unreasonable and unwarranted. They endeavor to leave the impression with the general public that every increase in the public debt means an additional burden to the interest charges that must be paid by the average taxpayer. Let us examine the details of the increases made to our public debt and find out how much of the \$48,000,000.00 really means in increased taxation to the average taxpayer.

"The province holds adequate security for the Wheat Pool Guarantee of \$5,650,000.00 and the interest charges connected with this guarantee, are paid by the Wheat Pool. The average taxpayer is not affected by the item of our increased debt.

"The Lethbridge Northern Irrigation District, organized by the Liberal Government, has necessitated an increase of four million dollars to our public debt since 1921. What proportion of this amount will result in an increased burden of taxation on the average taxpayer, is impossible to determine. With the return of better economic conditions, it is possible that the amount will not be excessive.

"Our telephone system which is responsible for an increase of \$3,500,000.00 to our public debt since 1921, showed profits from 1926 to 1929 inclusive, and there is every reason to believe that, under normal conditions, no burden will be added to the average taxpayer with respect to interest charges on this public utility.

"The Government has stated, on numerous occasions, that the public debt of the Province could be reduced by the amount invested in this utility which is now close to \$26,000,000.00 if the people of Alberta wished to do away with the public ownership of our telephone system.

"Now, Mr. Speaker, I do not want to get into an argument with the Minister of Public Works regarding earmarking of revenue but I am certain that the users of our highways pay sufficient in gas taxes and auto licenses to take care of the interest charges on the \$21,000,000.00 we have added to the public debt of the Province for highways and bridges since 1921.

"By the sale of our railways, we have effected a reduction of \$4,707,000.00 in our public debt which will be still further reduced by \$10,500,000.00 when the balance of the sale price is received.

"Public buildings, including the University Hospital account for an increase of over \$8,500,000.00 since 1921. This item includes most of the expenditures connected with the institute of Technology in Calgary, which was under construction in 1921.

"About \$2,500,000.00 is chargeable to our mental institutes and hospitals, a new Normal School, residences at Olds and Vermilion Schools of Agriculture, the new Administration Building, and many others are included in this \$8,500,000.00. There has never been any criticism in connection with the public buildings erected since 1921.

"This item for public buildings, plus the items of over two millions dollars for unemployment relief, and about, and about \$7,800,000.00 to take care of income deficits and working advances are the only items that directly increase the tax burden of the average taxpayer.

"By far the largest item in our increased debt for the past ten years, is in connection with highways. Those who use the highways and provide the revenue with which to maintain them and pay for the interest charges on the capital invested, have incessantly demanded, year after year, for more and better highways.

"Mr. Speaker, unless our opponents can show where in our capital expenditures made during the past ten years are unwarranted and unjustified, their criticisms cannot be considered seriously by the public."

(Continued next week.)

#### INCREASE IN NET FUNDED AND UNFUNDED DEBT

Year Ended December 31, 1931.

Net Funded and Unfunded Debt:	
December 31, 1931 .....	\$133,173,003
December 31, 1930 .....	114,761,088

*Decrease .....				

A town is like a large family. We are all interested in each other's welfare, or should be. A cut-throat, every-man-for-himself policy means ruin for any community. It means retrogression and failure. The first lesson that any family must learn is that to be happy and successful is unity and mutual assistance. The same applies to the business life of a town and the more generally it is obeyed the more abundant will be the town's prosperity. Stand by each other and patronize the home folks.

WHEAT AND INCREASED WORLD POPULATION

A very important factor in the world wheat situation which is frequently overlooked by the general public is the yearly increase in the world's population. While undoubtedly there has been a slowing down of the ratio of increase of population as compared with previous figures, the record for the ten year period from 1920-30 shows that the yearly increase is 1,625,000. That means that in the year 1930 there were 16,250,000 more people to be fed than in the year 1920. Based on the estimate of Mr. Sanford Evans, a Winnipeg statistician, of 2 1/2 bushels of wheat annual per capita consumption, in 1930 the world required 40,625,000 bushels of wheat more than it did in 1920.

The steady increase in the world population has been outdone by the increase in wheat acreage. For the 33 years up until 1930 the world's wheat acreage on the average increased between 2,000,000 and 3,000,000 acres per year. The trend has been the other way during the past two years, the decrease in acreage, the major wheat exporting countries last year alone having been 12,000,000 acres. Further reductions in acreage occur it will not take very long for the demand for wheat to overtake the supply.

## VIKING

F. H. Newcombe, district agriculturist, will be at Viking, to address a meeting at the town hall on Saturday, April 2nd, on the subject of Junior Club Work. Various phases of the work which is open to boys and girls will be discussed. Among the subjects to be taken up is Junior Cub in Swine, Calves, Grain, Sheep, etc., with special mention of the A'falfa Club which was organized here last year. It is the intention to organize one or more of the above clubs in this district if enough interest is manifested, so all interested are asked to attend the meeting which commences at 2:30 in the afternoon.

Once again the community is given the privilege of listening to the Viking Juvenile Band, Friday, April 1st, at 8:15 sharp. Three years ago this Band was organized with the main object of giving the boys and girls of Viking and district a chance to learn the fundamentals of music. Naturally they need encouragement and we know of no better way to supply this need than by filling the hall to capacity. Be on time as all band concerts are noted by the fact that they start when advertised. A program of bigger and better merit has been arranged for your approval. Aside from the Band numbers, which include marches, waltzes, tone poems and an overture, there will be a Cornet solo by Russell Alexander, a Zylphone Duet by the Jones Bros., a Baritone solo by Karl Rosen, a two act Juvenile play put on by 10 members of the band, and a BIG 15 minute SURPRISE. A two hour program that is worthy of your support. Because of depressed conditions, the admission will be Adults 35c, High School 25c and Children 15c. The publisher of the News is in receipt of a letter this week from H. L. Porter, former principal of the Viking schools some ten years ago, telling of the arrival of a daughter Barbara Delphine, born March 23rd. Mr. Porter had to give up teaching in account of his health but has improved and is now branch manager for the Monarch Life Assurance Co., at Fort William, Ont. The happy event is recorded as follows: Born at McKellar Hospital, Fort William, Ont., to Mr. and Mrs. H. L. Porter, formerly of Viking, Alta., a daughter, Barbara Delphine, weight nine pounds. Both doing well.

The Dance which was held in Young Peoples Country Club on March 28th was an absolute success. The Kinsella Night Hawk Orchestra proved to be a success that ever played in the hall before. An attendance of about 100 couples was reported and a good time was had by all.

W. C. Bissell, of the Calgary spring stock show this week with a herd of purebred Hereford cattle. Mr. and Mrs. Monte Hoskins of Paradise Valley spent Easter Sunday with Mr. and Mrs. Geo. Hoskins.

Percy Smith, formerly of the bank staff here, spent the week end here. He is now located at Camrose.

Mrs. Herman Kjelland received the sad news this week that her mother had died in Montana.

The dance in the Elks Hall on Monday evening proved a highly social event music being furnished by the Silver Club orchestra.

The death of Frank Merla, a respected citizen of this community, occurred on Tuesday evening at the Viking Hospital. The deceased had been suffering for some time from a lingering illness.

The funeral will be held at Prague on Friday of this week at 10:00 A.M. Rev. Fr. O'Neill officiating. An obituary will appear in this paper next week.

Here's something for Ripley and his "Believe it or not" column from Harry Johnstone, desk clerk in the Royal George. In a lifetime of hotel work, it is the first instance of such a coincidence that Mr. Johnstone has experienced.

J. W. Campbell, of Viking, stepped to the register and picked down the old moniker with a flourish.

Right behind came another guest who, not to be outdone, signed, "J. W. Campbell, Vegreville."

Mr. Johnstone looked at the register, rubbed his eyes, turned a bewildering glance on the two men, and then asked to be enlightened as to which was which.

Explanations were in order. Neither of the two men had ever met before; they are not related in any way. And the story fades out with a picture of Mr. Johnstone scratching his head and wondering how he is going to solve the riddle of "J. W. Campbell's mail."

**FROM "EQUALITY"**  
by EDWARD BELLAMY

We wholly overlook and disregard the peril of which life is exposed on the economic side—the hunger, cold and distress. We go on the theory that it is only by club, knife, bullet, poison or some other form of physical violence that life can be endangered; as if hunger, cold and distress in a word economic want—is not a far more constant and deadly foe to existence than all forms of physical violence together. We overlook the plain fact that anybody who by means however indirect or remote, takes away or curtails the means of subsistence, attacks his life quite as dangerously as it could be done by knife or bullet, more so indeed seeing that against direct attack we have a better chance of defending ourselves.

What hour, what day, what year, what season in which the number of deaths and the physical and moral anguish resulting from the anarchy of economic struggle, and the crushing odds against the poor does not outweigh as a hundred to one that same hours record of the death or suffering resulting from violence?

—Edward Bellamy.

## Bruce News.

On Tuesday evening of last week, about thirty friends of Mrs. J. W. Stambaugh, on the occasion of her birthday, staged a surprise party. The ladies brought along their husbands and the necessary refreshment, and presented Mrs. Stambaugh with a beautiful linen tablecloth. The party proved to be a complete surprise, good fellowship reigned, and the occasion stands as a testimonial to the popularity of Mrs. Stambaugh in the community.

The visitors provided their own entertainment, with music and the singing of old favorites. When the crowd gathered at the Stambaugh home, Mrs. Barker took her place at the piano and all sang in unison, "O Canada". Mrs. Holter rendered a solo, "Love's Old Sweet Song", which was followed with other musical interpretations. Ed. Gaudet, Mrs. Haight, Mrs. Holter and Mr. and Mrs. Stambaugh taking part.

Games and stunts rounded out the evening's entertainment, during which the writer was the recipient of a very fine bouquet of Easter lilies because he celebrated her two-first birthday on the twenty-first of March. The particularly happy affair came to a close with Mr. and Mrs. Stambaugh singing, "Let the Best of the World go by", followed by "Auld Lang Syne" by all present.

Last Wednesday evening the W. I. whist drive was held in the Hall. Ten tables were played, the success of the affair being due to Mrs. Hughes and Mrs. Parlett assisted by Mrs. Holdsworth and Mrs. Fredericks.

Prizes went to Mrs. Coleman and Johnny McArthur. Mrs. Coleman received a magnificent bouquet of tulips and Johnny came away happy with a necktie of gorgeous hue. Consolation prizes were awarded to Mrs. Lord, who received a basket of chickens, and Bob Coleman who also got a start in hen business with, very strange and marvellous to contemplate, a goose, (or was it a swan?) with seven chickens.

The club room was appropriately decorated for the Easter season, and even the tally cards were hand painted with Easter novelties.

Miss Driscoll is visiting her parents in Edmonton over the holidays.

With regret, it is reported that Henry Owens found it necessary to have his appendix removed at Viking Hospital last week. Last reports are that Henry is coming along fine.

Mr. and Mrs. A. Willans were visitors in Edmonton over the week end.

Mrs. R. Farlinger took her son Bobby to hospital in Edmonton last week where his tonsils and adenoids were successfully removed.

The Ladies Golden Rule Society met, appropriately on Good Friday, for their first regular meeting, at the home of Mrs. J. D. McArthur.

The main item of business was the formal adoption of the constitution. The date of meeting was fixed for the second Wednesday in each month. The next meeting, on April 13th, will be held in the Bruce Hall. At the conclusion of the business refreshment was served and a pleasant hour was spent about the tea table.

**TRUE FREEDOM**  
Men whose boast it is that ye  
Come of Fathers brave and free,  
If there be aught on earth to crave—  
Are ye truly free and grave?

If ye do not feel the chain  
When it works a brother's pain,  
Are ye not base slaves indeed?  
Slaves unworthy to be freed?  
Is true freedom but to break  
Fetters for our own dear sake,  
And with leathern hearts forget  
That we owe mankind a debt?  
No! true freedom is to share  
All the chains our brothers wear,  
And with heart and hand to be  
Earnest to make others free!

They are slaves who fear to speak  
For the fallen and the weak;  
They are slaves who will not choose  
Hatred, scoffing and abuse,  
Rather than in silence shrink  
From the truth they needs must  
think;

They are slaves who dare not be  
In the right with two or three.  
—Lowell.

"Wars between capitalists are inevitabilities, as much so as the wars between two hungry dogs, when one has a bone upon which the lives of both depend. The only difference between capitalists and dogs is, that dogs do their own fighting, whereas capitalists first rob the laborers who produce their commodities, and then persuade or compel them to fight their battles with fellow capitalists in their competitive efforts to distribute them."

—Rt. Rev. Wm. M. Brown, D.D.

**SURVIVAL OF THE FITTEST**  
But, to some people odd and funny  
Some men without a cent of money—  
The simple common human race  
Chose to improve their dwelling place:  
They had no use for millionaires,  
They calmly said the world was theirs,  
They were so wise, so strong, so many  
The millionaires—there wasn't any:  
These dead, O Man, which thou comest  
Prove the Survival of the Fittest.  
—Mrs. Charlotte Steison.

**ITEMS OF LOCAL INTEREST**

No matter how well organized a newspaper is, it is impossible for its reporters to gather all the local items of interest—someone of your acquaintance has taken a trip or returned from one; you have friends or relatives visiting you; a former citizen has returned on a visit—all of these small incidents, and many more, are of interest to our readers.

As we wish to make this paper a more live, local newspaper, we would greatly appreciate receiving local items from our readers. By informing us of local news, you are doing us an appreciated service, as well as a service to our readers.

# Electric Cooking and Its Advantages

**Economical - Clean - Fast - Convenient - Healthy**

**AN ELECTRIC RANGE IS ECONOMICAL BECAUSE**  
Food, of course, costs more than fuel. It is a well known fact that shrinkage on foods in preparation runs from ten to twenty per cent. This percentage, however, is greatly reduced when the food is cooked on an ELECTRIC RANGE, which means that your food budget is lessened for the simple reason that you buy less food. Furthermore, an ELECTRIC RANGE, properly operated, works for you at the surprisingly low cost of about one cent per meal per person.

**AN ELECTRIC RANGE IS CLEAN BECAUSE**  
There is no soot or smoke to smear your kitchen, pots and pans and other cooking utensils. No tedious scouring. Your draperies retain their original beauty longer, when you cook with ELECTRICITY, clean as sunlight. The ELECTRIC RANGE is easy to clean and equally easy to keep clean.

**AN ELECTRIC RANGE IS FAST BECAUSE**  
High speed surface elements give quick cooking heat, and the well insulated oven soon reaches baking temperature. Practically all the heat is conserved for cooking, very little being wasted. The ELECTRIC RANGE itself does not radiate heat.

**AN ELECTRIC RANGE IS CONVENIENT BECAUSE**  
The antiquated pastime of "pot-watching" is totally eliminated forever. This tiresome task is efficiently and accurately handled by the Automatic Timer and Oven Heat Control without your supervision. You slip the food in the oven, set the controls, and forget it, knowing that the meal will be perfectly cooked on time, every time, at dinner time. Modern recipes call for the application of specified temperatures for certain time intervals. The ELECTRIC RANGE does this for you to the degree and minute, which means that you experience a new freedom in cooking with positive assurance of better results. The ELECTRIC RANGE can be conveniently placed in your kitchen to save unnecessary steps, and will keep your kitchen cool because of its insulated oven, centering the heat inside, where it belongs.

**AN ELECTRIC RANGE IS HEALTHY BECAUSE**  
The full flavor of foods cooked ELECTRICALLY is retained in the food, which also applies to the vitamins, mineral salts and juices, so essential to a properly balanced meal, as the cooking is done with very little water, thereby conserving these health-giving elements, which are lost when ordinary methods are used.

Our prices on Electric Ranges, including installation in your home, are the lowest ever offered in Alberta. We invite you to consult our Local Manager for these prices and full details of our Convenient Time Payment Plan.

# WHICH STORES DO YOU LIKE BEST?

Isn't it true that stores which invite your custom oftenest, and which give you most information about their offerings, are those to which you go by preference?

Isn't it true that silent or dumb stores—stores which never tell you that your custom is wanted and valued, and which never send you information about their stocks and prices, are less favored by you than are stores which inform you, by advertisements in this newspaper, about themselves, their stocks, their prices?

Isn't it true that you want, before you go shopping, information about goods of desire, which are obtainable locally, and about where they can be obtained?

The fact is that advertisements are a form or kind of news, and careful buyers want the kind of news which sellers provide just as much as they want the news that it is the business of this newspaper to provide.

The reading of the advertisements appearing in this newspaper week by week not only will save you time, by telling you what and where to buy; but also they will direct you to "all alive" stores, providing goods which have been carefully selected and competitively priced.

**LOOK FOR THE STORE ADS IN THIS PAPER  
EACH WEEK FOR LIVE STORE NEWS.**

## RESTFUL SLEEP for FRETFUL, FEVERISH CHILD

—With Castoria's regulation

When your child tosses and cries out in his sleep, it means he is not comfortable. Very often the trouble is that poisonous waste matter is not being carried off as it should be. Bowels need help—mild, gentle help—but effective. Just the kind Castoria gives. Castoria is a pure vegetable preparation made specially for children's ailments. It contains no harsh, harmful drugs, no narcotics. Don't let your child's rest—and your own—be interrupted. A prompt dose of Castoria will urge stubborn little bowels to act. Then relaxed comfort and restful sleep! Genuine Castoria always has the name.

*Dr. J. C. Fletcher*  
**CASTORIA**  
CHILDREN CRY FOR IT

## WORLD HAPPENINGS BRIEFLY TOLD

Royal Canadian Mounted Police took up the task of enforcing law in Nova Scotia on April 1.

A modified form of state medicine was advocated in the House of Commons by Dr. J. P. Howden, Liberal, St. Boniface.

Mahatma Gandhi has added 11 books to his jail library. He has just completed reading the Bible again and has started re-reading the Koran. Manitoba's mineral productions were nearly doubled in the past year, according to the report of George E. Cole, director of mines for the province.

The French Chamber of Deputies turned thumbs down on woman suffrage, less than a month after it had voted overwhelmingly for votes for women.

Sister Mary Martha Butti, the oldest Franciscan nun in England, died at the Franciscan convent in her 90th year. She had not been outside the convent walls for more than 80 years. Faced with increasing fiscal imposts, directors of Paris theatres decided unanimously to discontinue performances unless measures of relief were enacted.

Hostilities with Japan in the Shanghai area have cost the Chinese 8,069 lives and \$400,000,000 in property losses, Wu Ta-Chun, chief of Chinese Department of Statistics, estimated.

The pretty life-sized playhouse which the Welsh people built for little Princess Elizabeth, grand-daughter of the King, was destroyed by fire as it was being taken to London to be presented to her.

Canadian boy marksmen won the King's trophy for miniature rifle-shooting, competed for by 33,000 boys in all parts of the empire, it was announced by the National Rifle Association.

### All Dressed Up

Down in certain mountain regions of the American South natives go barefoot most of the time. There is a story told about a young couple who were preparing to go to a party in a nearby hamlet. The husband having finished dressing stood aside in order that his wife might, inspect him. Surveying him from head to foot, she said: "I don't see why you hate so to go to parties, Elmer. You look good in shoes."

Mayor Pedro Rico of Madrid is studying a proposal to electrically heat the sidewalks of the city so as to alleviate winter suffering among the homeless.

Chillingham Castle, famous old Scottish Border stronghold, is for rent.

A hydraulic brake has been developed capable of stopping the heaviest airplane within 300 feet after landing.

## Weakness Of Co-Education

Professor Says Co-Education Have Fatal Attraction For Men Students

Although Dr. Hamilton Fyfe, principal of Queen's University, is inclined to agree with the opinion that women are a "sort of nuisance around a university," he declared emphatically that Queen's did not contemplate the erection of any barriers to co-education.

In fact, he said, some of the best students at the university are co-eds. However, he wished they did not have such a fatal attraction to the men students.

"When the students leave the classroom following a lecture," he explained, "instead of discussing some of the points in the lecture they have just heard, they promptly pair off and either discuss highlights of the party they attended the night before or make dates for other meetings."

## Where Taxes Are Taxes

British People Grin and Pay To Cancel Debts

British taxpayers, faced by an almost unheard of taxation burden, grin and pay. They paid in January and February this year, \$200,000,000 more than in the same months last year. At that rate the huge 1931 British deficit will be wiped clean by Jan. 1, 1933, and Britain will be out of the red of despair. And if you think the British taxpayer hasn't paid just remember that a married man with a \$5,000 income pays \$750 income tax, and an \$15,000 tax on a \$50,000 income.

## JUST THE MEREST HINT OF FEMINITY MARKS THESE DELICIOUSLY YOUNG PAJAMAS

It's a darling. The bodice is given a basque effect. A wide sash caught in at either side and tied at the back, draws it snugly to the figure. The short puffed sleeves are cute idea. However, if you wish to omit the sleeves then the pretty neckline frill will just turn the shoulder and form quite a delightful finish. And as for the trouser legs, they are shaped so as to affect a skirt, when not in motion.

A printed crepe silk made the original. Pale blue crepe satin, lace trimmed is dainty for bedtime. For resort or cruise, you'll adore these pajamas of white basket weave cotton that has a woolen aspect. Style No. 911 is designed for sizes 14, 16, 18, 20 years, 36, 38 and 40 inches bust. Size 16 requires 3 1/2 yards of 39-inch material with 3/4 yard of 35-inch contrasting. Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

## Pioneer Railroader

J. M. McKay, General Agricultural Agent Of the C.P.R. Western Lines

From turning handbrakes and manipulating the old link-and-pin couplers during the nineties, J. M. McKay, now general agricultural agent of the Canadian Pacific railway's western lines, arrived on Sunday, March 13th, at his 64th birthday with fingers intact and a vast fund of experience in pioneering in western Canada to his credit.

"Bruce County, of course," was his only explanation of his steady advance from practical railroading to his present executive responsibility. A few years on a farm homestead near Portage la Prairie, and one year—1892-93, patrolling Main Street as a Winnipeg policeman when the Black Maria was the nearest draw, preceded his entry into railroading on the Canadian Pacific.

Beginning in 1903, Mr. McKay drove an express wagon. He became a freight brakeman in 1905 on the Northern Pacific and was promoted to the position of conductor in 1909. In 1906 he was appointed trainmaster out of Winnipeg, and a year later at Souris. Back to Winnipeg in 1911, he took over the duties of acting superintendent of terminals, and in 1912 reached the position of assistant superintendent at Revelstoke. Fighting snowslides in the Rockies with success, he was rewarded with the less hazardous position of superintendent at Saskatoon, where he served from 1917 to 1929, the year in which he became general agricultural agent with headquarters at Winnipeg.

## How Much Does One See

Quite Possible To View Accident and Miss Intimate Details

There are occasions when evidence is given in accident cases where a witness is pressed for more detail, and we can recall several occasions where the suggestion has been made that said witness was not telling all that took place. It is quite possible that a witness may view an accident and yet fail to see many of the intimate details.

In a general way the witness does see the accident, but when it comes to answering all the questions which are certain to be asked it will be found that the powers of observation have their limitations. How far was the car from the victim when the witness first looked? At what rate was the car travelling? How far did the car go before stopping? When were the brakes applied? It is when specific questions are asked that the witness begins to realize that although he saw the accident, there were many things he did not observe.

A lubricating oil that will not stain fabrics has been developed by the United States bureau of standards for use on knitting machinery.

## Advance Of Aviation

Travels In Seven Days Distance That Formerly Required 35 Months To Negotiate

When the Africa air mail left the London air station, Croydon, England, recently, there travelled with it a man whose journey illustrated in remarkable fashion the advance of aviation manifested in the chain of 57 aerodromes and landing grounds between Cairo and Cape Town.

Thirty-two years ago Major Ewart Grogan, big game hunter and explorer, walked from the Cape to Cairo, taking three years. He toiled through thousands of miles of bush and jungle, frequently distressed by fever bouts brought on by the hardships of the march and the activities of myriads of disease-carrying insects that infested much of the track he followed. Time and again he was in danger from wild beasts and hostile natives; once a revolt broke out among his porters and he was forced to defend himself with his revolver.

This time Major Grogan went with the air mail, making in seven days the journey that took him 35 months less than a generation ago. He was the first passenger, apart from the members of the small official party which left Croydon on the inaugural flight, to fly through from London to South Africa by the new air route.

## Recipes For This Week

(By Betty Barclay)

### MINT FUDGE

- 3 cups sugar.
- 1/2 teaspoon peppermint extract.
- 1 cup milk.
- 2 tablespoons butter.
- 2 squares unsweetened chocolate.
- 1 teaspoon vanilla.

Boll sugar, milk and butter to soft ball stage when tested in cold water. Take from stove. Keep half the syrup liquid over boiling water. Beat other half to cream, add peppermint extract and turn on to buttered plate. To hot syrup add the chocolate, grated. Stir until chocolate is melted, beat until creamy, add vanilla and turn over first mixture. Mark into squares. The mint part of the fudge may be tinted with green vegetable coloring.

## APRICOT AND PRUNE MARMALADE

- 1/2 pound apricots.
- 1 cup sugar.
- 1/2 pound prunes.
- 4 cups water.

Wash the prunes and apricots thoroughly and put them in the water to soak overnight. Cook the fruit together for 10 minutes, add the sugar, and simmer until the juice is fairly rich. Pour into hot, clean, jelly glass. Seal.

## Voting Or Not Voting

Latter Might Be As Valuable To Community As Former

The right to vote—if it is right—involves the right not to vote—and the exercise of this latter right may, conceivably, be of as much value to the community as the exercise of the former.

There are elections in which the voter who is informed on affairs and honest with himself, finds it difficult or impossible to make a choice. To vote either way, he feels, would be a wrong. But of course, one can not expect the leaders of political parties to admit the possibility of any such contingency.—Vancouver Province.

By repeated heating in a furnace and cooling cast iron can be increased 40 per cent. in size without affecting its metallic properties, but at a sacrifice in strength.

## Education For Adults

People Should Continue To Learn After School Days Are Over

Education is usually supposed to be something for youth. The word calls up visions of public schools, high schools and colleges, with more or less eager youngsters flocking in to learn what they may about the life that lies ahead of them.

But Professor Leon J. Richardson, Director of the University of California Extension Division, points out that education for adults is one of the most important of the university's tasks, and that extension courses for grown-ups are now being offered by nearly 450 colleges and universities. "By the modern theory," he says, "a nation must inevitably deteriorate unless it can depend on a body of citizens who continue to learn after school days are over and thus adapt themselves to the changing conditions of the world in which they live."

This is a theory—or, rather an axiom, a self-evident fact—that we need to have called to our attention rather frequently.

The growing complexity of the world has placed a great responsibility on the shoulders of the average citizen. A century or more ago a nation could get along very nicely if all hands left the understanding and direction of things to a small, specialized group at the top. The great mass of people never bothered about any problems not directly connected with the events of daily life—and the system worked out fairly well.

But those days are gone forever. We must not only learn all we can about the ins and outs of the daily job; we must, whether we like it or not, become informed about the entire world, because things that happen in far-away places on the other side of the globe can affect us in a profound and intimate way.

It is often said that we need wise leadership in these complicated times. That is quite true; but wise leadership is powerless unless those whom it is to lead know what it is all about. Humanity has seldom had quite as many chances to go rushing down a steep place into the sea as it has today. The danger won't be avoided unless we of the rank and file keep mentally abreast of the times.

## Remarkable Coincidence

Men Interested In Vancouver Island Had Ancestors In Same Place

An interesting coincidence in connection with the efforts of Frank J. D. Barnjum to save some of the giant Douglas fir trees on Vancouver Island for posterity, through their purchase by him, is the fact that Captain George Vancouver, one of the first explorers to visit that island, and after whom it was named was born in King's Lynn, Norfolk, while one of the direct ancestors in the made line of Mr. Barnjum, Henry Barningham (the spelling was changed in the seventeenth century), also came from King's Lynn, having been mayor for several years, member of Parliament 1449 to 1472, and English Ambassador to the Court of the King of Dacia (the old Roman Kingdom that lay between the Danube and the Carpathian Mountains).

Mr. Barnjum is a direct descendant of Sir Richard de Barningham, of Barningham Hall, Barningham, Norfolk.

Hence the man who was connected with the first discovery of Vancouver Island, when it was completely covered with giant timber, like the man who is now trying to save some of the last of its big trees, had ancestors who lived originally in King's Lynn.

## Farm Horses Come Back

Horse Regaining Favor As Cheap Farm Power

The present low price of oats and other feeds in contrast with the higher costs of gas and oil required in tractor operation combine, as the Dominion Animal Husbandman suggests, to indicate that the horse is rapidly regaining favour as a medium of farm power. He predicts that the next few years will see a revival in horse breeding and the use of heavy draft horses on the farms of Canada both east and west. As he points out, under present conditions horses can be bred and reared cheaply and when they have reached working age, the charges for depreciation, fuel and repairs are surprisingly low, for the self-oiling engine has nothing whatever on the self-repairing heavy draft horse.

## Why Canadians Kick

Canadians kick at the entertainment provided by United States radio stations, not only because of the monotonous flood of advertising of foreign products and the mournful droning of the crooners, but because of the unblinking way in which United States artists (7) travesty anything that is foreign to their country.

## League Membership Dues

China Said To Be In Arrears To The Extent Of \$1,900,000

Some countries pay their annual dues to the League of Nations other dues. Like any other gentlemen's club, memberships are sometimes in arrears when, as in the case of China and the South American republics, civil wars, revolutions and such domestic annoyances deplete the national treasury. The league, then, is out of luck.

Interesting facts relative to this are disclosed in a return tabled in the senate at the behest of Major-General W. A. Griesbach. It shows, among other things, that Canada at least pays her way—and that handsomely.

Canada's assessment in 1931 amounted to \$212,573, and she paid on the nail. China's was in the neighborhood of \$300,000, but the former celestial kingdom has been hard up for a long time. In fact China owes the league \$1,900,000 in membership fees, being her consolidated arrears for the past nine years. The year 1930 was a bad one for the league's collecting agency. No fewer than seven of the nine South American members passed up their dues, four of them—Bolivia, Paraguay, Argentina and Peru—in whole, and three—Uruguay, Chili, and Colombia—in part.

The seven nations of the British Empire who are members of the league's collecting agency. No fewer than seven of the nine South American members passed up their dues, four of them—Bolivia, Paraguay, Argentina and Peru—in whole, and three—Uruguay, Chili, and Colombia—in part.

Since 1919 Canada has spent \$2,429,244 on the activities of the league, monies expended on assessments, incidental expenses and delegations.

## Poultry On The Farm

One Of The Best Paying Lines Of Farm Effort

Official records show that the poultry population of Canada has doubled each ten years during the period of the past thirty years. Each succeeding period of low prices for farm products finds the poultry flock coming to the farmer's rescue. At the present time it can easily be shown that the poultry flock properly bred, housed, and looked after is, from the standpoint of capital investment and feed cost, one of the best paying lines of farm effort. Each succeeding year appears to make it more clear that the farm is the logical place for the development of the poultry industry with respect to both eggs and meat production. The farm flock is a useful medium for the marketing of otherwise unsaleable products in the form of eggs and poultry meat. Banks and loan companies find the farm which has a poultry flock a much better risk than the one which has none.—Dept. of Agriculture, Ottawa.

## Worth a Half Dollar

The editor of a weekly newspaper in a small town received a subscription renewal from a native son who had moved to another part of the country. The distant subscriber also enclosed 50 cents in postage stamps with a note that read: "Now sit down, write me a letter and tell me the news you can't print."

Time is a cat which scratches at the corners of a man's mouth and eyes. If he smiles at the cat, the scars turn up at the ends. If he scowls at it, the corner of the scars turn down.

"I passed the screen test!" she exclaimed. "Flies do the same, to get inside," was his calm reply.

Shortage of native coal has retarded Latin America's industrial development.
